**Subject:** settlement case Stop all these lawsuits

Stop all these Lawsuits. AOL is the pot calling the kettle black and is continuing the disruption of an economic recovery! Create your rules and pardon what ever violations you think Microsoft committed. The consumers are being hurt by these Companies using the Justice system to destory one another so they may take control of the market. Throw out the AOL case immediately. I have stock in both companies and use AOL as you can see by my email address. Microsoft has not inhibited my ability to choose a browser! AOL wants to only be compensated for their own poor judgement in purchasing Netscape and wants to disrupts the competition for broadband. These lawsuits are bad for the consumer, the stock holders and the Country. The only people who win are the lawyers! "The Stillmans" Pepper Pike, OH
